

# KRANOL MS

## TECHNICAL DATA SHEET

---

FATLIQUOR WITH SOFTENING PROPERTIES, AND A LOW-FOGGING

---

### Chemical and physical characteristics

Appearance (25 °C) : brown viscous gelly  
Ionicity : anionic  
Active Principle : modified lecithin and natural and synthetic oils.  
pH solution 10% :  $7 \pm 1$   
Active Contents :  $80\% \pm 2\%$   
Light fastness : average  
Storage Stability : at ambient temperature the product is durable 12 months

Product water emulsion is stable with electrolites usually used in tannery process

---

### Characteristics

**KRANOL MS** is a set up to be used in fatliquoring process of wet blue leathers and chrome/vegetable tanned leathers.

**KRANOL MS** is particularly suitable for the production of upholstery and nappa articles, giving very soft and full leathers.

**KRANOL MS** can be used alone or in combination with any other suitable fatliquors, we recommend to use with KRANOPOL GLH, for upholstery and shoe

---

### Percentages

The application quantities depend on the type of leather to be treated and on the desired effect varying from 2 to 10%:

SHEEPSKINS = 4% - 5%  
GARMENT LEATHER = 3% - 5%  
UPHOLSTERY LEATHERS = 2% - 6% (\*)  
SHOE UPPER LEATHERS = 2% - 5% (\*)

(\*) to use in combination with KRANOPOL 327 and KRANOPOL GLH
