

KRANOSYNT HQ

Product Information

Synthetic oils and hydrophobic emulsifiers

Chemical and physical characteristics

Appearance 30°C: clear creamy

Ionicity: anionic

Active Principle: synthetic oils and hydrophobic emulsifiers

pH (Solution 10%): 7 ± 1

Light fastness: good

Stability: it is stable to electrolytes ,in normal concentrations.

Active Substance: $48\% \pm 2\%$

Shelf-life : one year.

Storage Stability: the product should be stored at temperature between 5°C and 45°C.

Characteristics

Due to his particular combination of synthetic oils, **KRANOSYNT HQ** is a fatliquor for all types of soft leathers .for example ,garment , gloving and upholstery. Can be used as a top- fatliquor to improve the water repellency. After the use of **KRANOSYNT HQ** it is necessary to lower the PH at least to 3,9 by means of formic acid. After washing ,**KRANOSYNT HQ** should be fixed in new bath through the addition of chrome, aluminium or zirconium salts.

Percentages

The percentages of utilisation of **KRANOSYNT HQ** will vary depending on the type of leathers and the desired articles.

KRANOSYNT HQ can be employed alone or in combination with every type of anionic fatliquor.
