TPK-701

Chemical nature	Water dispersion of aliphatic polyurethane
Appearance	Liquid
Solids content	20 \pm 1 %
pH	3,5 – 4,5
Ionicity	Cationic

Applicazioni

TPK-701 è un poliuretano alifatico cationico in dispersione acquosa. E' un prodotto di buona penetrazione indicato come legante nei fondi cationici rullabili o lissabili per migliorare gli ancoraggi delle rifiniture che seguono. Se ne consiglia l'impiego su pelli che richiedono rifiniture particolarmente leggere, tipo nappa abbigliamento o calzatura.

Main applications

TPK-701 is a water dispersion of cationic aliphatic polyurethane. It has good penetration features and it is suitable as binder for cationic bottom coat to be glazed or polished, in order to improve adhesion. We suggest to use it for soft and light articles such as garment nappa or shoes.

KEEP FROM FREEZING; CAN BE STORE FOR 6 MONTHS BETWEEN +5 AND +35°C.

Our application recommendation are in line with our present state of knowledge and they do not exempt the customer from performing his own tests to determine the suitability of the supplied products for the intended purposes.
