TTC-602

Chemical nature	Modified casein binder
Appearance	Viscous liquid
Solids content	9 ± 1 %
pH	7,5 – 9,5
Ionicity	Anionic

Applicazioni

TTC-602 è un legante caseinico modificato con cere e prodotti riempienti. Trova impiego nelle rifiniture lissate e nei fondi rullati per ottenere una migliore chiusura del fiore senza alterarne la naturalezza. Può anche essere utilizzato nei lucidi finali come componente parziale, per la sua scarsa flessibilità.

Main applications

TTC-602 is a casein binder, modified with waxes and filling products. It can be used for all articles to be glazed and in bottoms to be polished, in order to improve grain sealing without affecting natural look.
Due to its poor flexibility, it can be also used as partial binder for final top coat solutions.

KEEP FROM FREEZING; CAN BE STORE FOR 6 MONTHS BETWEEN +5 AND +35°C.

Our application recommendation are in line with our present state of knowledge and they do not exempt the customer from performing his own tests to determine the suitability of the supplied products for the intended purposes. Application of the products lies outside the scope of our control and therefore comes within the customer's sphere or responsibility. We guarantee the satisfactory quality of our products subject to general terms of sale and delivery.
