TTP-759

Chemical nature	Water dispersion of aliphatic polyurethane
Appearance	Liquid
Solids content	17 \pm 1 %
pH	7,0 – 9,0
Ionicity	Anionic

Applicazioni

TTP-759 è una dispersione acquosa di poliuretano alifatico. Forma un film fine mediamente morbido lucido, il suo impiego è consigliato quale componente di profondi da rullare o lissare e in tutte quelle applicazioni dove si debbano migliorare le caratteristiche di solidità generali.

Main applications

TTP-759 is a water dispersion of aliphatic polyurethane and it forms fine, medium-soft and glossy films. It is very suitable in pre-bottom solutions to be glazed or polished and in all application where enhancement of general resistance is required.

KEEP FROM FREEZING; CAN BE STORE FOR 6 MONTHS BETWEEN +5 AND +35°C.

Our application recommendation are in line with our present state of knowledge and they do not exempt the customer from performing his own tests to determine the suitability of the supplied products for the intended purposes. Application of the products lies outside the scope of our control and therefore comes within the customer's sphere or responsibility. We guarantee the satisfactory quality of our products subject to general terms of sale and delivery.
