TWC-1507

Chemical nature	Water dispersion of Polyurethane
Appearance	Viscous whitish liquid
Solids content	25 \pm 1 %
pH	7.0 – 8.0
Ionicity	Anionic

Applicazioni

TWC-1507 è una emulsione poliuretana ed additivi vari al fine di ottenere nelle mani finali per articoli nappa, arredo e pelletteria una mano particolarmente gommosa e siliconica. Se ne consiglia l'utilizzo in combinazione con altri poliuretani al fine di migliorarne le resistenze ed il grado di lucido.

Main applications

TWC-1507 is a water dispersion of polyurethanes and additives formulated to obtain a gummy and silicone-like touch on nappa and upholstery articles. We suggest to use it in combination with other polyurethanes in order to improve mechanical resistance and glossy effect.

KEEP FROM FREEZING; CAN BE STORE FOR 6 MONTHS BETWEEN +5 AND +35°C.

Our application recommendation are in line with our present state of knowledge and they do not exempt the customer from performing his own tests to determine the suitability of the supplied products for the intended purposes. Application of the products lies outside the scope of our control and therefore comes within the customer's sphere or responsibility. We guarantee the satisfactory quality of our products subject to general terms of sale and delivery.
