TWK-306

Chemical nature	Water solution of casein
Appearance	Turbid liquid
Solids content	5,0 ± 1 %
pH	2,0 – 3,0
Ionicity	Cationic

Applicazioni

TWK-306 è una caseina cationica di media durezza particolarmente indicata come profondo rullabile e per articoli lissati per l'ottimo potere di chiusura dei bassi di fiore. Puo' inoltre essere usato in miscela con resine e poliuretani cationici per modificarne l' appiccicosità e il tatto. Le eventuali differenze di viscosità non pregiudicano la qualità ne il risultato applicativo.

Main applications

TWK-306 is a cationic, medium-hard casein, very suitable as polishable pre-bottom and for articles to be glazed, due to its high grain-sealing features. It can also be used together with polyurethanes and resins, in order to tune touch and stickyness of films . The possible difference in viscosity of batches does not affect its application features.

KEEP FROM FREEZING; CAN BE STORE FOR 6 MONTHS BETWEEN +5 AND +35°C.

Our application recommendation are in line with our present state of knowledge and they do not exempt the customer from performing his own tests to determine the suitability of the supplied products for the intended purposes. Application of the products lies outside the scope of our control and therefore comes within the customer's sphere or responsibility. We guarantee the satisfactory quality of our products subject to general terms of sale and delivery.
