TWK-307

Chemical nature	Water emulsion of modified amides
Appearance	White liquid
Solids content	10 \pm 1 %
pH	5,5 – 6,5
Ionicity	Cationic

Applicazioni

TWK-307 è un modificatore di tatto ceroso leggermente grasso. Il suo impiego nelle miscele cationiche di copertura è indicato per aumentarne la chiusura. Può essere utilizzato sia su pelli naturali che rifinite, da solo o in combinazione con gli altri nostri modificatori. È particolarmente apprezzato su pelli nappa abbigliamento.

Main applications

TWK-307 is a feel modifier with waxy and slightly greasy touch.

It can be used to improve the sealing feature of cationic solutions. It can be used either on natural or very coated leather, alone or in combination with other modifiers.

It is particularly suitable for garment nappa articles.

KEEP FROM FREEZING; CAN BE STORE FOR 6 MONTHS BETWEEN +5 AND +35°C.

Our application recommendation are in line with our present state of knowledge and they do not exempt the customer from performing his own tests to determine the suitability of the supplied products for the intended purposes.
