

## TWS – water-solvent soluble dyes

### Descrizione

La sigla TWS caratterizza una gamma di coloranti metallo-complessi, solubili sia in fase solvente che in acqua .  
La gamma è selezionata per ottenere colori brillanti, da utilizzare in ogni fase di rifinitura, dalla tintura a spruzzo al film finale, sono compatibili sia con prodotti anionici che cationici e possono essere addizionati direttamente ai pigmenti. Non compatibili con vernici poliuretaniche bi-componente.  
Per l' utilizzo nella tintura a spruzzo, possono essere diluiti con acqua e solventi organici come etilglicole, alcol isopropilico, alcool etilico o metossipropanolo.

### Description

TWS- series is a range of metal-complex dyes soluble in solvent and water. This range is selected to obtain very bright shades, to be used in several finishing steps, from spray-dyeing to final lacquers; they are well compatible with either anionic and cationic products and can be directly added to pigments. They cannot be used in two components PU lacquers.  
For their use in spray-dyeing, they can be diluted with water and organic solvents such as ethyl glycol, iso-propyl alcohol, ethyl alcohol and methoxypropanol.

KEEP FROM FREEZING. CAN BE STORE FOR 6 MONTHS BETWEEN +5 AND +35°C.
