TWX-424

Chemical nature	Water emulsion of natural oils
Appearance	Creamy liquid
Solids content	50 \pm 1%
pH	5,5 – 6,5
Ionicity	Slightly cationic

Applicazioni

TWX-424 è un'emulsione di oli leggermente cationica che può essere usata nei prefondi cationici per diminuire gli assorbimenti e i bassi di fiore e nelle coperture di pelli morbide per conferire riempimento e morbidezza. Con particolare attenzione può essere facilmente miscelato con prodotti anionici verificarne sempre la compatibilità.

Main applications

TWX424 is a slightly cationic water emulsion of oils. It can be used in cationic pre-bottom in order to decrease absorption and blind grain defects and in covering solutions for soft leathers, in order to improve filling and softness. It can be carefully mixed with anionic products, but we suggest to make small trials to check compatibility before industrial use.

KEEP FROM FREEZING; CAN BE STORE FOR 6 MONTHS BETWEEN +5 AND +35°C.

Our application recommendation are in line with our present state of knowledge and they do not exempt the customer from performing his own tests to determine the suitability of the supplied products for the intended purposes.
